SMOOTH HYDRAULIC DAMPENING

The hydraulic dampening system under the tilt platform ensures a smooth, controlled descent while loading equipment, providing maximum protection for your cargo.

DURABLE, REMOVABLE FENDERS

Double-Broke Diamond Plate Steel Fenders provide durability to withstand commercial-grade usage. Plus, they're removable, adding another level of convenience and flexibility.

EXPANDED CARGO SPACE

This model features an additional deck area providing you with enhanced material hauling versatility for a wide variety of applications.

EZ PEDAL LATCH & CONTROL VALVE

Equipped with an easy-to-use EZ pedal latching system and a control valve, this model offers a simple and efficient way to lock the hydraulic dampening system, ensuring a secure and smooth operation.
